Low-Wider Trailers (Right Corner Porch)	28-31
Low-Wider Trailers (No Porch)	32-35

TUMBLEWEED TRAILER

Made in the USA, Tumbleweed trailers create a perfect foundation for your RV. Designed specifically to carry your most prized possession—your Tiny House RV.

SAFETY

Tumbleweed ensures your quality-built trailer comes standard with brakes, lights, underside flashing and special trailer radial tires. These tires are a significant upgrade from tires normally found on utility trailers and extremely important for your safety. These radials differ from traditional bias-ply tires in their construction, minimizing tread wear and improving flexibility for better handling with heavier loads.

The tires we use are designed specifically for trailers with heavier loads and carry a manufacturer's warranty of four years. We use ST225/75R15, 5,200 lbs per axle* that should provide you with 30,000 miles of service with proper care and maintenance. You should be checking the tire pressure on all your vehicles once a month at a minimum.

Our suspension package, with multiple 5,200 lb axles*, comfortably carries the weight of your tiny home. Standard 3,500 lb axles found on standard trailers may not meet your needs.

*Utility trailers. Deck Over specs: ST235/80R16 and 7,000 lb axles.

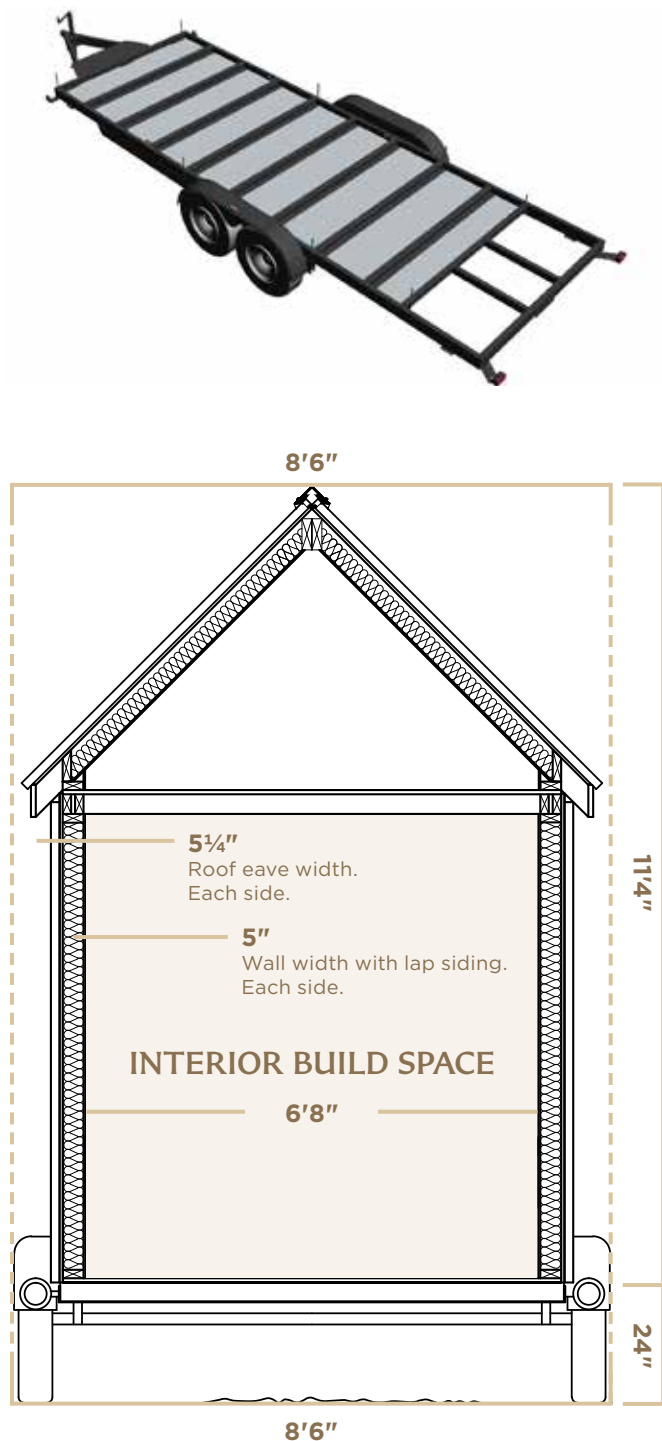

DELIVERY

Alabama: \$1,000	Iowa: \$1,200	Nebraska: \$1,000	Rhode Island: \$1,100
Arizona: \$1,300	Kansas: \$1,000	Nevada: \$1,300	South Carolina: \$1,000

Indiana: \$1,000	Montana: \$1,400	Pennsylvania: \$600	Wyoming: \$1,000

UTILITY TRAILER

All of our utility trailers are specially designed for Tiny House RVs. We ensure the quality of each and every custom built trailer using the best materials to make sure you have a strong foundation for your build. The utility trailer gives you an extra 3½" of head room and allows for a sleeping and storage loft to be built as well. If you are interested in the Cypress™, Elm™ or Linden™ models, this is the trailer for you.

8'6" is the max width allowed by the Department of Transportation (DOT).

All measurements approximate. Utility trailer only.

DIMENSIONS

- 6' 11" deck width, all models
- 8' 6" overall width
- 18', 20', 24' and 26' deck lengths
- 4' tongue length, all models

STRUCTURAL SPECS

- deck frame - 5"x2"x.188 tubing fully welded
- tongue frame - 5"x2"x.188 tubing fully welded
- 5/8" threaded rod - 60,000 PSI tensile strength (x8)
- bottom flashing - 18 gauge galvanized steel sheet

TOWING SPECS

- axles - 5,200 lbs load rating each. All axles are standard with brakes. Standard trailers are tandem axle for 18' and 20', triple axle for 24' and 26'
- tires ST225/75R15 6 lug special trailer tire
- 2-5/16" standard ball hitch rated for 14,000 lbs
- dual safety chains rated for 15,000 lbs each
- lights - standard tail lights, rear 3-light center light, fender clearance lights and front corner clearance lights
- electrical wiring - 7 blade trailer connector

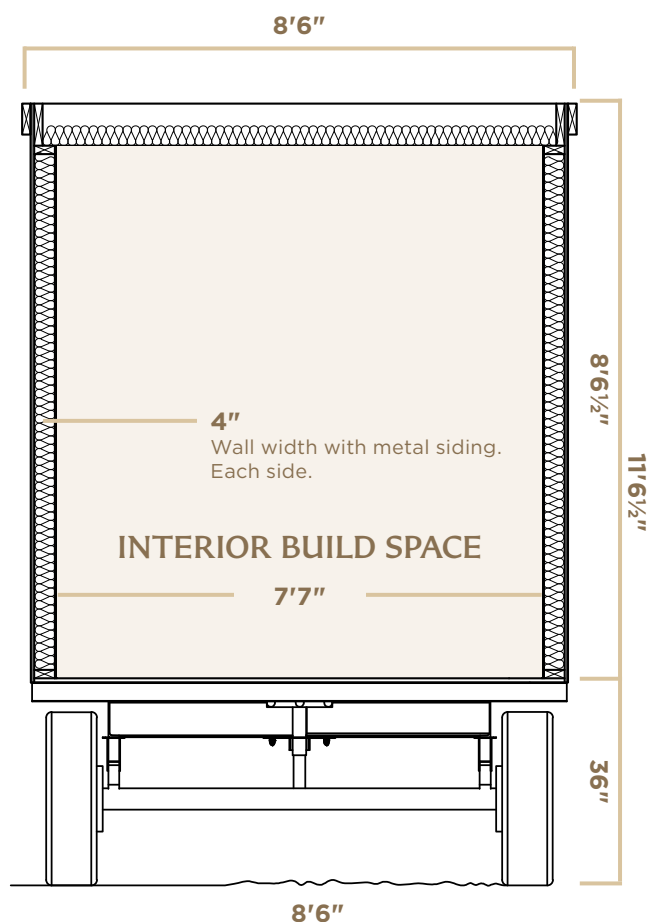

JACKS

- hitch lifting jack rated for 2,000 lbs.
- scissor leveling jacks mounted in each corner

DECK OVER TRAILER

The deck over trailer is perfect for those who want a first floor only recreational space. The deck is built over the wheels and the axles can hold more weight than our utility trailer. Deck over trailers are also wider than utility trailers giving you more interior space. If you are interested in the Mica™ model, this is the trailer for you.

8'6" is the max width allowed by the Department of Transportation (DoT).

All measurements approximate. Deck Over trailer only.

DIMENSIONS

- 7' 11" deck width, all models
- 20', 24' and 26' deck lengths
- 4' tongue length, all models

STRUCTURAL SPECS

- deck frame - 3"x2"x.120 tubing fully welded
- tongue frame - C7x12.25# C- channel fully welded
- 5/8" threaded rod - 60,000 PSI tensile strength (x8)
- bottom flashing - 18 gauge galvanized steel sheet

TOWING SPECS

- axles - 7,000 lbs load rating each. All axles are standard with brakes. All deck over models are tandem axle
- tires/wheels - ST235/80R16 8 lug special trailer tire
- 2-5/16" adjustable height standard ball hitch rated for 14,000 lbs
- dual safety chains rated for 15,000 lbs each
- lights - standard tail lights, rear 3-light center light, front corner clearance lights
- electrical wiring - 7 blade trailer connector

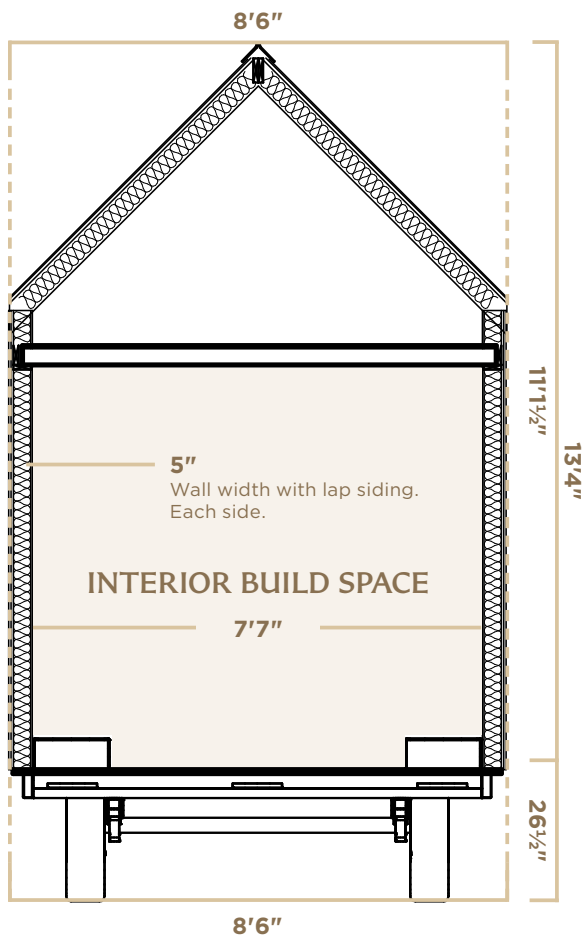

JACKS

- hitch lifting jack - rated for 2,000 lbs.
- scissor leveling jacks mounted in each corner

LOW-WIDER TRAILER

If you are looking to maximize your space, the Low-Wider trailer can help. Wrapping around the wheel wells allows you to increase the overall build width and height. The new found space gives you the option to add a sleeping and storage loft inside your Tiny House RV all while meeting the Department of Transportation maximum width of 8'6".

8'6" is the max width allowed by the Department of Transportation (DoT).
All measurements approximate. Low-Wider trailer only.

DIMENSIONS

- 7' 11" deck width, all models
- 18', 20', 24' and 26' deck lengths
- 4' tongue length, all models

STRUCTURAL SPECS

- deck frame - 5"x2"x.188 tubing fully welded
- tongue frame - 5"x2"x.188 tubing fully welded
- 5/8" threaded rod - 60,000 PSI tensile strength (x8)
- bottom flashing - 18 gauge galvanized steel sheet

TOWING SPECS

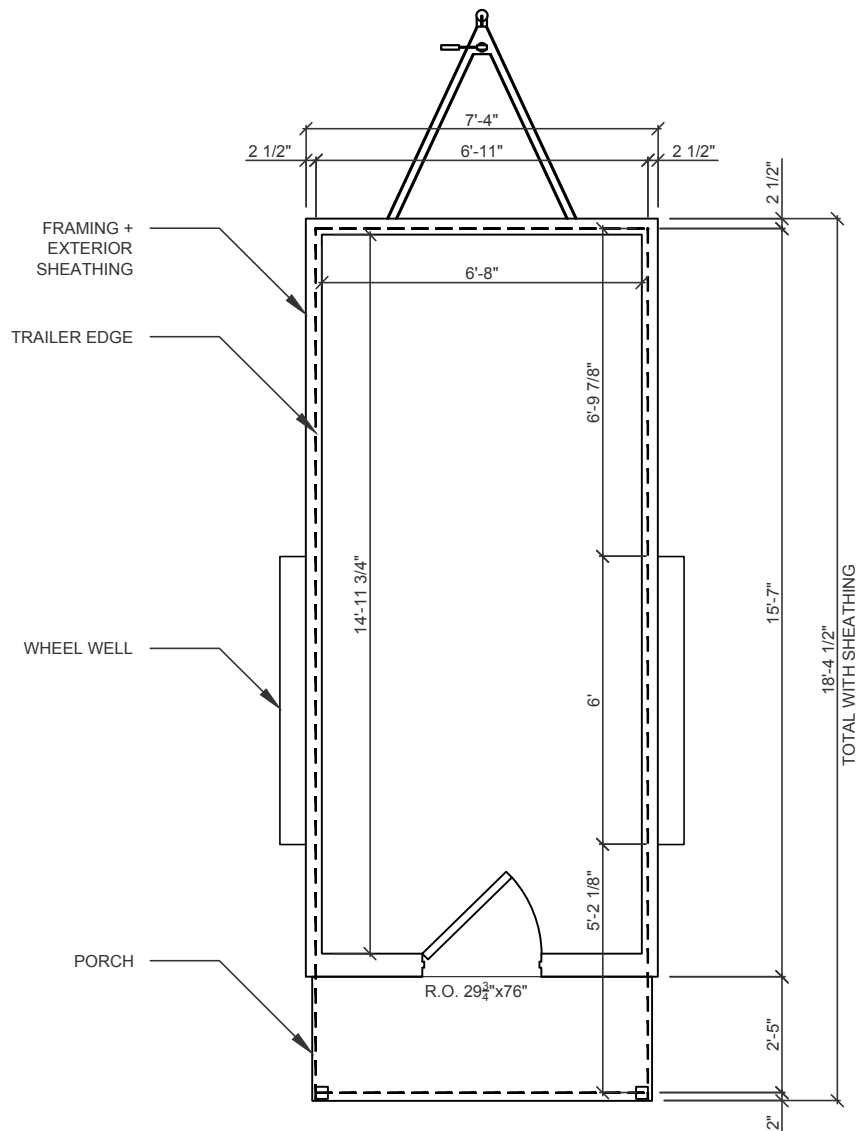

- axles - 7,000 lbs load rating each. All axles are standard with brakes. All Low-Wider models are tandem axle
- tires/wheels - ST235/80R16 8 lug special trailer tire
- 2-5/16" adjustable height standard ball hitch rated for 14,000 lbs
- dual safety chains rated for 15,000 lbs each
- lights - standard tail lights, rear 3-light center light, front corner clearance lights
- electrical wiring - 7 blade trailer connector

JACKS

- hitch lifting jack - rated for 2,000 lbs.
- scissor leveling jacks mounted in each corner

DREAM BIG GO TINY

A 2-DAY WORKSHOP

SAVE TIME, MONEY AND THE ENVIRONMENT

Do you dream of building your own Tumbleweed Tiny House RV, simplifying your life and freeing yourself from hefty financial commitments? But you're not sure how or even where to start? Join us at one of our workshops to hear from real people who have built their own Tumbleweed RVs and learn from their real life experience.

Tumbleweed's 2-day workshop is packed with insightful and practical information which will help you design and build your very own Tiny House RV—setting you on a path to a simplified, economically-balanced, environmentally-friendly lifestyle.

Skillfully presented by actual Tumbleweed Tiny House RV owners/builders—who happily share their stories and experiences on subjects such as choosing the appropriate trailer base, selecting green materials, and the importance of using the right tools, etc.—these workshops cover many aspects of Tiny House RV construction and use.

You'll be provided with comprehensive, detailed information on Tumbleweed Tiny House RV building that you can't learn anywhere else—and you'll get to meet many other like-minded people in a fun and engaging setting.

So join us at an upcoming Tumbleweed Workshop and start redesigning your life. We look forward to seeing you there!

WHAT YOU'LL LEARN

What's a workshop? Merriam-Webster defines it as "a class or series of classes in which a small group of people learn the methods and skills used in doing something."

Planning Your Build

Create your game plan to save you money and time. Get expert advice firsthand.

Tiny House RV Design

Classic looks, state of the art design, old world mobility for tomorrow's lifestyle.

Trailers

Your foundation and your freedom—discover the best way to connect your structure to your trailer.

Framing & Sheathing

Make it strong. Make it reliable. And make it last for 50 years.

Roofing, Windows, Doors

Learn how to protect your Tiny House RV from the elements

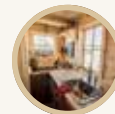

Siding and Trim

Do it right and do it in style with recycled or new materials.

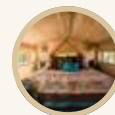

Systems

From composting to solar to organic insulation, we have answers to your questions.

Interior Finish

Express your personal style; create a beautiful, comfortable and cozy living space.

Downsizing

Get rid of the clutter and make space for what's really important.

PRESENTER/HOST STORIES:

Ella Jenkins

Ella and her dad came to the Los Angeles workshop and built her Cypress™ together.

Art Cormier

Art used SIPs and reclaimed wood to build his Elm™ before making the Construction DVD.

Meg Stephens

Meg designed the Linden™ model for Tumbleweed and is now building her very own.

Brittany Yunker

Brittany attended the Olympia workshop before building her custom Cypress™.

Eddie Lanzo

Eddie's Tiny House RV is a manifestation of his desire to learn how to build and live intentionally. He shares this with his fiancée Lacey.

Guillaume and Jenna

Guillaume and Jenna are taking their Tumbleweed on a 1 year road trip to all 4 corners of the United States.
